

Playwright with Java Script

Sr.No	Day	Description
1	Day-1	Introduction Playwright VS Selenium
2	Day-2	Javascript variables & data types
3	Day-3	Logical operators and Conditional Statements
4	Day-4	Loops
5	Day-5	Functions and methods
6	Day-6	Arrays
7	Day-7	Classes and Objects
8	Day-8	Promises & Async Await
9	Day-9	Playwright Overview and Installation
10	Day-10	Test Execution with CLI
11	Day-11	Locating Web Elements
12	Day-12	Playwright Assertions (hard and Soft)
13	Day-13	Handling Input box & Radio Buttons
14	Day-14	Handling checkboxes
15	Day-15	Handling Dropdown
16	Day-16	Handling Multi Select Dropdown
17	Day-17	Handling Auto Suggest DropDown
18	Day-18	Handle Dialogs Or Alerts
19	Day-19	Handle Frames/iFrames
20	Day-20	Handle Inner/Nested Frames
21	Day-21	Web Table Automation
22	Day-22	Handle Calendars /Date Pickers
23	Day-23	Mouse Hover Actions (Mouse Right Click/Context Click Action)
24	Day-24	Mouse Drag and Drop, Keyboard Actions
25	Day-25	Upload Files In playwright
26	Day-26	Hooks in Playwright
27	Day-27	Grouping test scripts in Playwright
28	Day-28	Capture Screenshots with Playwright
29	Day-29	Record Videos for tests, Trace Viewer
30	Day-30	Tag, Annotations
31	Day-31	Page Object Models
32	Day-32	How to handle Multiple Windows in playwright
33	Day-33	Playwright Reports
34	Day-34	How to run Failed test scripts
35	Day-35	Rest API testing
36	Day-36	Generate Allure report
37	Day-37	Parallel Execution

38	Day-38	Test Retries
39	Day-39	API Authentication

Description

Playwright - Test automation framework developed by Microsoft. Modern, highly customizable and reliable.

This class covers all fundamental concepts of the framework. We begin from scratch, starting with setup and configuration and then a hands-on framework overview to familiarize yourself with the environment. Then from lesson to lesson, we slowly increase complexity. All lessons have a logical progression and are connected. The next lesson in the section builds up a new concept on top of what was learned in the previous lesson. This is also related to the code demonstrated in the class. We will have two test applications, and slowly over the course will add more and more code uncovering new topics.

Thank You
